Re: Petition # 99P-4613

I wholeheartedly support the move to ban Bovine **Growth** Hormone from the market. Sooner or **later** the public is going to learn the serious health risk they **create** for themselves when they consume dairy products. Future generations will be **furious with** those **in** the government that were responsible for allowing such a **poison to be in our food supply**.

**Cut your losses now, ban Bovine Growth Hormone and apologize to all those who have been consuming it. Encourage the people of the United States to do something that will promote health and well being, not sickness and disease – Promote a plant based diet.**

Respectfully yours,

Leslie Dodd
